

CAPCOA GHG Rx Review Committee (GRRC) Agreement - Accepting Credits on the Rx
April 23, 2014

- Each Participating District will accept any credit listed on the Rx that was generated under any protocol approved for use on the Rx except the Case-by-Case Protocol.
- Each Participating District will accept any credit listed on the Rx that was generated under the Case-by-Case Protocol if it has been accepted by the GRRC by unanimous vote.
- Case-by-Case credits listed on the Rx that have not been accepted by the GRRC can be presumed to be accepted by the District that issued the credits, but other Districts should be consulted about accepting such credits before purchase.
- Each Participating District will notify the GRRC when it receives an application for a Case-by-Case project and will collaborate with other interested Participating Districts on the review of the application to support GRRC acceptance of the credits.
- When the GRRC has accepted Case-by-Case credits for a project type, that project type will proceed to protocol development unless there is a reason not to proceed (for example, insufficient projects of that type to warrant a protocol).
